CRISIL Ratings Limited (A subsidiary of CRISIL Limited)

## Rating Rationale

August 24, 2021 | Mumbai

### Embassy Office Parks Reit

'CRISIL AAA/Stable' assigned to Non Convertible Debentures

#### Rating Action

<b>Rs.300 Crore Non Convertible Debentures</b>	<b>CRISIL AAA/Stable (Assigned)</b>
<b>Non Convertible Debentures Aggregating Rs.7750 Crore</b>	<b>CRISIL AAA/Stable (Reaffirmed)</b>

1 crore = 10 million

Refer to Annexure for Details of Instruments & Bank Facilities

#### Detailed Rationale

CRISIL Ratings has assigned its 'CRISIL AAA/Stable' rating to the Rs 300 crore non-convertible debentures (NCDs) of Embassy Office Parks Reit (Embassy REIT), and has reaffirmed the 'CRISIL AAA/Stable' rating on existing instruments/NCDs. The rating assigned to the NCDs is for refinancing the existing debt in one of the special-purpose vehicles (SPVs).

The ratings reflect the trust's comfortable loan-to-value (LTV) ratio driven by low debt and strong debt protection metrics, supported by a cap on incremental borrowings; and stable revenue and rent collection from the underlying assets, given the high-quality of the commercial assets, healthy occupancy, contractual rent escalations and geographical diversification. These strengths are partially offset by exposure to refinancing risks and susceptibility to volatility in the real estate sector, resulting in fluctuations in rental rates and occupancy.

Revenue grew by 9% in fiscal 2021 to Rs 2,561 crore from Rs 2,340 crore in fiscal 2020, driven by the acquisition of Embassy Tech Village (ETV). Same store revenue growth remained muted due to Covid-19 induced increase in vacancy level, however same store net operating income (NOI) grew by 2% in fiscal 2021. CRISIL Ratings expects Embassy REIT to observe double-digit growth from fiscal 2023 supported by the completion of under construction area, contractual rental growth, improvement in occupancy levels as well as improvement in hospitality business. The occupancy level of the Embassy REIT stands at 89% as on June 30, 2021, including ETV. However, same store occupancy has fallen to 87% in the first quarter of fiscal 2022 from 94% during the corresponding period of the previous fiscal. Nonetheless, the increase in vacancy is anticipated to be short term with gradual improvement expected post the current fiscal. Additionally, Covid-19 has also led to the adoption of a hybrid working model by many corporates. Any impact of this on the occupancy as well as micro market of the REIT will remain key monitorable.

#### Analytical Approach

CRISIL Ratings has combined the business and financial risk profiles of Embassy REIT with its underlying SPVs, and has applied the criteria for rating entities in homogeneous groups. This is because Embassy REIT has direct control over the SPVs and will support them during exigencies. Additionally, there is minimal structural subordination of cash flow, wherein the SPVs have to mandatorily distribute 90% of their net distributable cash flow (after servicing of debt) to Embassy REIT, leading to highly fungible cash flow. Also, as per the Real Estate Investment Trust Regulations, 2014, of Securities and Exchange Board of India (SEBI), the cap on borrowing by the real estate investment trust (REIT) has been defined at a consolidated level (equivalent to 49% of the value of Embassy REIT's assets).

Please refer Annexure - List of entities consolidated, which captures the list of entities considered and their analytical treatment of consolidation.

#### Key Rating Drivers & Detailed Description

##### Strengths:

- **Strong debt protection metrics:** Consolidated gross debt rose to Rs 10,867 crore as on June 30, 2021, from Rs 5,876 crore as of June 30, 2020. The increase in debt level was mainly due to acquisition of ETV. Going forward the funds required for ongoing construction activities may further increase the consolidated gross debt. However, the debt protection metrics still remain strong with LTV and debt-to-EBITDA (earnings before interest, tax, depreciation and amortisation) ratios expected to remain comfortable at less than 40% and 5.0 times respectively. A low LTV ratio protects investors from the risk of decline in property prices and the consequent impact on refinancing.
- **Stable revenue of SPVs part of REIT:** More than 95% of the revenue comes from 12 established and high-quality commercial assets and one solar park, with stable operations and track record of at least five years of rental collection. The acquisition of ETV has further strengthened the stability of cash flow. Consolidated revenue was Rs 2,561 crore for fiscal 2021 as against Rs 2,340 crore for fiscal 2020, supported by timely rental escalations as well rent collections from tenants. Rental collections from office occupiers was robust despite the pandemic, reflected in over 99% collection witnessed in fiscal 2021 and the first quarter of fiscal 2022. Rentals have an upside potential on account of the superior asset and service quality; favourable locations in prime areas; healthy demand in the respective markets; and competitive rental rates.
- **Strong tenant profile with a well-diversified portfolio:** REIT owns and operates office spaces, a solar park and hotel properties spread out across prime areas of Bengaluru, Mumbai, Pune, and the National Capital Region. The group has a total of 42.4 million sq ft of available office area with a healthy mix of operational (around 76%) and under-construction assets. The commercial assets have robust occupancy, averaging 89% as on June 30, 2021, with a multinational occupier base, of which Fortune 500 companies account for 48%. The top 10 tenants contributed around 38% of rentals.

##### Weaknesses:

- **Susceptibility to volatility in the real estate sector:** Rental collection (key source of revenue) is susceptible to economic downturns, which constrains the tenant's business risk profile and, therefore, occupancy and rental rates. Emergence of competing facilities in the vicinity could also have the potential to cannibalise tenants or rental rates. However, office rental collection for fiscal 2021 and the first quarter of fiscal 2022 for Embassy REIT was robust over 99%.
- **Exposure to refinancing risks:** All NCDs issued by the REIT have bullet payments at the time of redemption. Sizeable debt and redemption premium for the existing NCDs increase the risk of refinancing. However, the risk is mitigated by the availability of call option

in NCDs, healthy consolidated leverage and extensive experience of the management.

All the NCD instruments have multiple call options available starting from the 30<sup>th</sup> month till the final maturity, which provides the trust with sufficient time to arrange funds or refinance the NCDs prior to the due date. Further, SPVs of REIT have the flexibility to raise lease rental discounting (LRD) loans from banks for the purpose of refinancing the NCDs, thereby giving access to large pool of capital from banking sector. Further, new avenues of capital are available in the form of investments from pension funds and insurance companies (recently allowed by the respective regulators), which reduces the refinancing risk.

#### **Liquidity: Superior**

Liquidity is likely to remain supported by stable cash flows from the underlying assets. The debt level remains moderate for the REIT. The NCDs are non-amortising, exposing the debenture-holders to refinancing risk. However, the conditions around redemption provide the REIT with sufficient time to arrange for refinancing. Furthermore, consolidated debt at the REIT level is not expected to exceed LTV ratio of 40%, protecting investors from the risk of decline in property prices and the consequent impact on refinancing. As of June 30, 2021, REIT has a cash balance of Rs 175.2 crore to support its day-to-day operations as well as has sanctioned undisbursed debt of Rs 1,354.9 crore for ongoing construction activities.

#### **Outlook: Stable**

CRISIL Ratings believes Embassy REIT will continue to benefit from the quality of its underlying assets over the medium term.

#### **Rating Sensitivity factors**

##### **Downward factors:**

- Depreciation in the value of the underlying assets or higher-than-expected incremental borrowings, resulting in LTV ratio of over 40%
- Covid-19 led disruption in micro market demand dynamics leading to decline in occupancy level below 85% on a sustained basis.
- Significant delay in the completion and leasing of under-construction assets
- Any non-adherence to the structural features of the rated debt

#### **About the trust**
