IBBI Registered Valuer (L&B)
(IBBI/RV/02/2022/14979)

B. VALUATION APPROACH AND METHODOLOGY

1. Purpose of Valuation

The Report is being prepared to be relied upon by the Reliant Parties and inclusion, as a whole, a summary thereof or any extracts of the report, in any documents prepared in relation for the disclosure of valuation of assets forming part of the portfolio of Embassy Office Parks REIT under the Securities and Exchange Board of India (Real Estate Investment Trusts) Regulations, 2014 [SEBI (REIT) Regulations], as amended, together with circulars, clarifications, guidelines and notifications thereunder by SEBI and also disclosure as per fair value accounting under Indian Accounting Standards (Ind AS 40).

2. Valuation Guidelines and Definition

Given the purpose of valuation as mentioned above, the valuation exercise has been carried out to estimate the “Market Value” of the Subject Properties in accordance with the IVSC International Valuation Standards issued in 2021 and effective from 31st January 2022. As per IVSC International Valuation Standards, “Market Value” is defined as ‘*The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm’s-length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion.*

3. Valuation Approach

The basis of valuation for the Subject Property being Market Value, the same has been derived by the following approach:

Discounted Cash Flow Method using Rental Reversion

The market practice in most commercial/ IT developments involves contracting tenants in the form of pre-commitments at sub-market rentals to increase attractiveness of the property to prospective tenants typically extended to anchor tenants. Additionally, there are instances of tenants paying above-market rentals for certain properties as well (primarily owing to market conditions at the time of contracting the lease). In order to arrive at a unit value for these tenancies, we have considered the impact of such sub/above market leases on the valuation of the Subject Property.

For the purpose of the valuation of Subject Properties, Income Approach - Discounted Cash Flow Method using Rental Reversion has been adopted.

4. Valuation Methodology

In order to compute the Market Value of the Subject Property the following understanding /assessment is required:

- a. Micro Market Assessment where the Subject Property is located.

- b. Portfolio Assessment (existing and future supply, demand from occupiers, average office space take up by an occupier in a particular sector, existing vacancy and the rentals)
- c. Situation of the Subject Property (current achievable rentals, vacancy numbers, competing supply in the micro market etc.) with respect to the micro market.

The details are elaborated below:

Portfolio & Rental Assessment:

- The area details, ownership interests of the Subject Property has been provided by the Client.
- Physical site inspections were conducted to assess the current status of the Subject Property.
- The rent rolls along with corresponding leases deeds (on a reasonable sample basis) were reviewed to identify tenancy characteristics for the Subject Property.
- The current effective rent is weighted average rentals for leased office/ retail plus other income.

Preparation of Future Cash Flows:

- Computing the monthly rental income projected and translating the same to a quarterly cash flow.
- The operational expenses of the respective properties are reviewed to understand the recurring, non-recurring, recoverable and non-recoverable nature expenses and accordingly estimate the margins on the common area maintenance income, which accrues as cash inflows to the Subject Property and normalised for the purpose of cash flow projections.
- The projected future cash flows from the Subject Property are based on existing lease terms for the operational area till the expiry of the leases or re-negotiation, whichever is earlier, following which, the lease terms have been aligned with market rents achievable by the Subject Property.
- The cash flows for the operational, under construction and proposed development area have been projected separately for the purpose of estimating and reporting valuation in accordance with the SEBI (REIT) Regulations
- For vacant area, under-construction area and proposed development area, the achievable market rent-led cash flows are projected factoring appropriate lease-up time frame for vacant/under-construction/proposed development area.

- Recurring operational expenses, fit-out income (wherever applicable, however, the same has not been included in the NOI for the purpose of arriving at the terminal value by capitalisation) and vacancy provision have been adopted in-line with prevalent market practices and conditions.
- In addition, appropriate rent-free periods have been adopted during lease roll-overs to consider potential rent-free terms as well as outflows towards brokerage.
- These cash flows have been projected for 10-year duration from the date of valuation wherein 11th year Net operating income (NOI) is capitalized for the assessment of terminal value. These future cash flows are then discounted to present-day value (valuation date) at an appropriate discount rate to arrive at the Market Value of the Subject Property.

5. Information Sources

The Subject Property related information for the valuation exercise have been provided by the client, unless otherwise mentioned. The documents provided has been assumed to be a true copy of the original. The rent rolls have been cross checked with the lease deeds on a sample basis only to ensure its correctness.

B REVIEW FINDINGS

Our exercise has been to review the Stated Procedure, which has been used, for conducting valuation of Properties in connection with the disclosure of valuation of assets, forming part of the portfolio of Embassy REIT, in accordance with the Securities and Exchange Board of India (Real Estate Investment Trusts) Regulations, 2014, as amended, together with clarifications, guidelines and notifications thereunder in the Indian stock exchange, in accordance with IVS 104 of the IVSC International Valuation Standards issued in 2021, effective from 31 January 2022.

The approach adopted by C&WI would be to review the Stated Procedure, which would have a significant impact on the value of Properties, such as:

- Achievable Rental for the property/ies
- Rental Growth Rate
- Construction Timelines
- Capitalisation Rate
- Discount Rate

C&WI has:

- Independently reviewed the key assumptions as set out in the Stated Procedure and is of the opinion that they are reasonable.
- Independently reviewed the approach and methodology followed and analysis as set out in the Stated Procedure, to determine that it is in line with the guidelines followed by RICS and hence is appropriate.

C&WI finds the assumptions, departures, disclosures, limiting conditions as set out in the Stated Procedure, relevant and broadly on lines similar to RICS guidelines. No other extraordinary assumptions are required for this review.

We observe that the assumptions noted in Annexure 2, reflect these factors.

Below is the summary of the properties as per 30 September 2024 rent roll, that has been reviewed:

No consideration will be given to liens or encumbrances, which may be against the assets. Therefore, no responsibility is assumed for matters of a legal nature.

Annexure 2: Extract of Methodology & Key Assumptions for the Valuation of Properties

Note: The Properties has been referred to as “Subject Properties” by the valuer. Similar representation has been followed in this section.

Valuation Approach and Methodology

- **PURPOSE OF VALUATION**

The purpose of this valuation exercise is to estimate the value of the Subject Properties as part of the portfolio of Embassy Office Parks REIT, for reporting purposes under the SEBI (Real Estate Investment Trust) Regulations, 2014, as amended, together with clarifications, guidelines and notifications thereunder and also disclosure requirement of fair valuation of investment properties as per SEBI.

- **VALUATION GUIDELINE AND DEFINITION**

Given the purpose of valuation as mentioned above, the valuation exercise has been carried out to estimate the “Market Value” of the Subject Properties in accordance with the IVSC International Valuation Standards issued in 2021 and effective from 31 January 2022.

As per IVSC International Valuation Standards, “Market Value” is defined as ‘*The estimated amount for which an asset or liability should exchange on the valuation date between a willing buyer and a willing seller in an arm’s-length transaction after proper marketing and where the parties had each acted knowledgeably, prudently and without compulsion.*’

- **VALUATION APPROACH**

The basis of valuation for the Subject Properties being Market Value, the same has been derived by the following approach:

Discounted Cash Flow Method using Rental Reversion

The market practice in most commercial/ IT developments involves contracting tenants in the form of pre-commitments at sub-market rentals to increase attractiveness of the property to prospective tenants typically extended to anchor tenants. Additionally, there are instances of tenants paying above-market rentals for certain properties as well (primarily owing to market conditions at the time of contracting the lease). In order to arrive at a unit value for these tenancies, we have considered the impact of such sub/above market leases on the valuation of the Subject Properties.

For the purpose of the valuation of Subject Properties, Income Approach - Discounted Cash Flow Method using Rental Reversion has been adopted.

- **VALUATION METHODOLOGY**

In order to compute the Market Value of the Subject Properties the following understanding /assessment is required:

- a. Micro Market Assessment where the Subject Properties is located.

- b. Portfolio Assessment (existing and future supply, demand from occupiers, average office space take up by an occupier in a particular sector, existing vacancy and the rentals)
- c. Situation of the Subject Properties (current achievable rentals, vacancy numbers, competing supply in the micro market etc.) with respect to the micro market.

The details are elaborated below:

Portfolio & Rental Assessment:

- The area details, ownership interests of the Subject Properties have been provided by the Client.
- Physical site inspections were conducted to assess the current status of the Subject Properties.
- The rent rolls along with corresponding leases deeds (on a reasonable sample basis) were reviewed to identify tenancy characteristics for the Subject Properties.
- The current effective rent is weighted average rentals for leased office/ retail plus other income.

Preparation of Future Cash Flows:

- Computing the monthly rental income projected and translating the same to a quarterly cash flow.
- The operational expenses of the respective properties are reviewed to understand the recurring, non-recurring, recoverable and non-recoverable nature expenses and accordingly estimate the margins on the common area maintenance income, which accrues as cash inflows to the Subject Properties and normalised for the purpose of cash flow projections
- The projected future cash flows from the Subject Properties are based on existing lease terms for the operational area till the expiry of the leases or re-negotiation, whichever is earlier, following which, the lease terms have been aligned with market rents achievable by the Subject Properties.
- The cash flows for the operational, under construction and proposed development area have been projected separately for the purpose of estimating and reporting valuation in accordance with the SEBI (REIT) Regulations
- For vacant area, under-construction area and proposed development area, the achievable market rent-led cash flows are projected factoring appropriate lease-up time frame for vacant/under-construction/proposed development area.
- Recurring operational expenses, fit-out income (wherever applicable, however, the same has not been included in the NOI for the purpose of arriving at the terminal value by capitalisation) and vacancy provision have been adopted in-line with prevalent market practices and conditions.
- In addition, appropriate rent-free periods have been adopted during lease roll-overs to consider potential rent-free terms as well as outflows towards brokerage.
- These cash flows have been projected for 10-year duration from the date of valuation wherein 11th year Net operating income (NOI) is capitalized for the assessment of terminal value. These future cash flows are then discounted to present-day value (valuation date) at an appropriate discount rate to arrive at the Market Value of the Subject Properties.
